

Providinggreen is a Florida Limited Liability Company that focuses on the offering of clean energy and environmental friendly products and service. The Company was founded in 2010 by a couple of entrepreneurs with the idea of caring and improving the level of renewable resources through technology and products that contribute to the community in order to preserve the quality of planet earth.

The goal of the Company is to provide clean energy solutions at affordable prices through the offering of services to all types of customers including residential, commercial, and government institutions. The products are focused on assisting communities in the process of transition from conventional energy (oil, nuclear power, coal, etc.) to clean energy solutions through the use of the sun and air as primary resources in order to achieve the harmony of our planet.

Providinggreen mission is to recover and improve the quality of life for future generations. Therefore, there are many reasons why the implementations of clean energy techniques are essential with the most basic being the preservation of the planet earth. Moreover, it has been proven that businesses that applied ecofriendly and alternative energy goods and services received benefits that are reflected in saving energy costs, tax advantages, self-sufficiency, embracing the makeover of the company, and positive customer perception towards them.

Providinggreen has the ability to design and implement energy solutions integrating different devices derived from renewable sources of electricity including wind, solar photovoltaic, and thermal. Our company has the ability to offer the following products which are only declarative and not exclusive: 1) Solar Panels Mono crystalline and poly crystalline that can be applied to traffic lights, fans, attics, etc.; 2) Solar Farms for electricity supply; 3) Solar Water Heaters to be applied to residential and recreational levels (swimming pools) including water pumps; 4) Solar Batteries and sealed lead acid gel and open; 5) Electrical Components such as inverters, voltage controllers, cables and connectors, installation bases, etc.; 6) Solar Charging Stations which include roofing made of solar panels that can be implemented for different applications such as shopping centers, sports fields, recreational parks, etc. Some of the benefits of these products are charging of mobile phones, computers, and fans, among others; 7) Educational Toys; 8) Recycling Machines for waste wood, plastic, glass waste, and minerals; 9) Beach Cleaner Machines used to sift the sand to remove trash, foreign matter, and oxygenate the sand; 10) Wind Systems - comprised of wind turbines; and 11) Hydroponic Cultivation Systems encompassing organic fertilizers and irrigation systems based on conventional electrical or clean energy structures.

The Company has achieved commercial connections of high recognition working closely with manufacturing entities located across several continents to offer high quality products to our customers such as Asia (HIMIN Solar, Yingli Solar, among others); Europe (Conergy, Tamesol, etc.); and North America (Canadian Solar, Solar Grape, among others).

Providinggreen is in the process of completing the trademark registration for "Providinggreen - Improving Future" with the United States Patent and Trademark Office under the serial number [8657571](#). This process was commenced on March 25, 2015 and is in examination status.

Providinggreen is currently certified as a "Small Business Enterprise" in order to take part in bidding processes with the Miami Dade, Broward, Palm Beach, and other Counties located in South Florida. Additionally, Providinggreen is registered as a certified provider institution with Agencies that pertain to the Federal Government of the United States such as Provider for the South Florida Water Management District, and Public Schools throughout the Miami Dade and Broward counties. Furthermore, the Company also provides services to large private companies such as Disney Worldwide, and operates through the Florida Export Directory.

Our company has the assistance of an Engineering and Logistics team in order to offer our customers the most optimal installation process, maintenance, storage, transportation of products, and services.

Providinggreen's areas of marketing and sales are concentrated in Latin America and the Caribbean via the export of products and the implementation of commercial, residential, and government projects. Some of the projects have been focused on facilitating the installation of solar energy systems in the areas of swimming pools, marine spots, street lighting, just to name a few. In addition, the company has focused its marketing development at a national level while implementing projects of clean energy consumption in educational and recreational spaces and assisting the community with the ecological evolution and social responsibility.

Providinggreen has the ability to offer its customers credit assistance via strong financial relations with prestigious institutions operating through funds obtained by the Government of the United States, Latin America, and Asia including Inter-American Development Bank (IDB); The Export-Import Bank of the United States (EXIM Bank); Florida Export Finance Corporation (FEFC); Banco Latinoamericano de Comercio Exterior (Bladex); The Export-Import Bank of China (China EXIM Bank); and private banking institutions.

We invite you to learn more about this wonderful project, which encourages the community and individuals to promote the future of our generations. For more information, visit our website www.provindinggreen.com or contact us directly.
